Muzinich & Co

Nous privilégions le sur-mesure, car nous estimons qu'il n'existe pas de solution unique pour les obligations, les prêts, la dette titrisée et la dette privée

Intégration
ESG

Engagement
ESG

Dette privée

- Face au manque de publications ESG sur les marchés illiquides, nous avons développé en interne un formulaire et une fiche d'évaluation ESG
- Nous effectuons une *due diligence* ESG approfondie avant tout engagement et un suivi ESG continu

Prêts

- Le grand nombre d'émetteurs privés sur le segment des prêts exige une évaluation en interne plus qualitative de la gestion des risques ESG par rapport aux obligations

Obligations d'entreprises

- La publication d'informations ESG détaillées permet une intégration plus large des facteurs ESG
- L'existence d'indicateurs comparables permet le recours à des overlays ESG *best/worst-in-class*

- Capacité d'influencer les conditions générales et les clauses restrictives (p. ex. exigences spécifiques en matière de publication d'informations ESG)
- Démarche de partenariat à long terme pour l'engagement dans le but d'améliorer le profil ESG de l'emprunteur pendant toute la durée du prêt

- Comme pour les obligations, nous dialoguons avec les émetteurs sur les questions de transparence ESG et/ou de gestion des risques ESG
- Nous travaillons avec l'UNPRI et l'ELFA* pour contribuer à l'amélioration de la transparence ESG sur le marché des prêts

- Les grands portefeuilles diversifiés exigent une démarche d'engagement très ciblée
- Possibilités de collaboration avec d'autres porteurs d'obligations pour donner plus de poids au dialogue

Dialogue ESG avec les entreprises

Muzinich & Co

En tant que prêteurs de capitaux, nous dialoguons activement avec les entreprises via notre dispositif propriétaire de notation ESG

Le dialogue ESG de Muzinich

- Nos analystes crédit sont chargés de dialoguer en direct avec les entreprises et en collaboration avec d'autres investisseurs
- Le détail des dialogues est enregistré dans une base de données centralisée, partagée avec l'ensemble de l'équipe d'investissement.
- Le détail des dialogues et leurs résultats sont inclus dans les comptes rendus de recherche, le cas échéant
- Les raisons pour ne pas participer à un investissement pour des raisons ESG doivent être communiquées
- Nos initiatives de dialogue combinent une approche *bottom-up* axée sur les risques financiers à court terme et une approche *top-down* axée sur les thèmes ESG macroéconomiques à plus long terme (par exemple, le changement climatique)

Muzinich views and opinions. For illustrative purposes only. Not to be construed as investment advice. Risk management includes an effort to monitor and manage risk but does not imply low or no risk.

L'intensité carbone des investissements sur les marchés privés nous semble peu élevée en termes absolus et relatifs, par rapport aux marchés publics, mais la lutte contre les émissions de carbone et la recherche de solutions pour résoudre la crise climatique restent néanmoins, des impératifs.

Considérations « Net Zero » dans les portefeuilles de dette privée

- ✓ **Dialogue** - Échanger avec les entreprises du portefeuille sur les questions de transparence, de guidance et de gestion des risques climat
- ✓ **Incitation** - Proposer une réduction des coûts de financement moyennant la réalisation d'indicateurs clés de performance ESG et/ou l'atténuation du changement climatique
- ✓ **Réduction** - Réduire l'exposition aux entreprises à plus forte intensité carbone qui ne visent pas le « net zéro »

Les initiatives de Muzinich

- ✓ **Engagement** - Transition vers le « net zéro » au niveau opérationnel
- ✓ **Reporting** - Publication périodique de l'empreinte carbone de l'entreprise
- ✓ **Achat** - Recours aux énergies renouvelables lorsque possible
- ✓ **Compensation** - Compenser uniquement les émissions les plus difficiles à réduire et seulement en dernier recours

Muzinich & Co

- Parmi les exemples de modèles économiques évités, on peut citer les prêteurs sur salaire, les fabricants d'armes, les entreprises de jeux d'argent et les fabricants de produits à base de drogues et d'alcool.

IRR potential, strategy objectives, aims or other indication of levels of return objectives or yield sought by a particular Fund or with respect to investments ("Aims") are based on a variety of factors and assumptions and involve significant elements of subjective judgment and analysis. You should understand that these Aims are intended to provide insight into the level of risk that Muzinich is likely to seek with respect to an investment or Fund. As such, Aims should be viewed as a measure of relative risk, with higher Aims reflecting greater risk. They are not intended to be promissory or predictive. Aims are estimates based on a variety of assumptions, which generally include but are not necessarily limited to, Muzinich's assumptions about: current and future asset yields and projected cash flows related thereto investments and Funds, current and future market and economic conditions, prevailing and future interest rates, including the cost of use of leverage, where applicable, historical and future credit performance for investments or Funds, and other factors outside of Muzinich's control. Aims are inherently subject to uncertainties and the assumptions on which they are based may prove to be invalid or may change without notice. Other foreseeable events, which were not taken into account, could occur. You should not rely upon the Aims in making an investment decision. Although Muzinich believes that there is a sound basis for the Aims presented, no representations are made as to the accuracy of such Aims or the performance of any investment, account or Fund. **There can be no assurance that any particular Aim will be realized or achieved.**
